DETAILED ACTION

Priority

1. Acknowledgment is made of applicants' claim for foreign priority under 35 U.S.C. 119(a)-(d). None of certified copy of the priority documents have been received.

Claim Objections

2. **Claims 19-21** are objected to because of the following informalities: Method claims 19-21 depend from Claim 1 which is an apparatus claim. For purpose of examining, Examiner assumes that claims 19-21 depend from Claim 9.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. **Claim 9** recites the limitation "the digital oscillator" in line 13. There is insufficient antecedent basis for this limitation in the claim.

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 2644

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. **Claims 1-29** are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-29 of U.S. Patent No. 6,661,292. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant independent claims 1, 9, and 22 are broader than the patented claims 1 (error signal vs filtered error signal), 9 (dividing vs decimating; phase position vs phase difference), and 22 (means for controlling the oscillator vs means for providing the oscillator control signal), respectively, and would therefore be obvious to one of ordinary skill in the art to realize that the newly broaden claims are essentially similar to the claims of parent case.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:
